Lead Generator

Public Access

PUBLIC USER

This is the page you'll see when you access the application from a public location.

A public location is any network outside of Pavion or a Pavion VPN - a customer's office for example.

1. Visit **leads.afap.com** to create and submit a new lead
2. Your email address will help the system identify you, and submit your lead to your manager
   (if you mistype your address, your lead will still be saved and a default manager will be alerted)
3. Specify your manager here if you are new to the application or your manager has changed
4. The rest of the form is typical and self explanatory
   a. Fields with asterisks (*) are required
   b. Either an email address or a mobile number is required (both is better)
   c. Submit the lead with the **SUBMIT LEAD** button.
